

Notice of Data Security Incident

Somnia, Inc. (“Somnia”) is currently investigating a data security incident and is in the process of determining who may need notified of the incident.

On November 21, 2024, Somnia identified suspicious activity associated with its email environment, implemented its incident response protocols and ensured all email accounts were secure. Independent cybersecurity specialists were engaged to assist with an investigation. The investigation found that there was unauthorized access to a limited number of email accounts. On December 10, 2024, Somnia determined that protected health information may be present in some of the impacted accounts. A thorough review to identify any protected health information is underway, and letters will be mailed once this process is complete. Information that may be impacted includes names and some combination of the following: addresses, dates of birth, health information such as diagnosis/treatment/condition, and health insurance information, and Social Security numbers for a limited number of individuals.

What is Somnia doing?

Somnia reset passwords and reinforced multi-factor authentication measures on all email accounts. Letters will be mailed to individuals for whom Somnia has addresses, which will contain more information about the incident as well as instructions for enrolling in credit monitoring and identity protection services if appropriate.

What you can do:

Individuals should be vigilant for the next 12 to 24 months and review credit reports, bank account and other financial statements, and immediately contact their financial institution if they identify suspicious activity. Individuals should also monitor their estimate of benefits (or EOB) for suspicious medical activity as well.

For more information:

For questions or concerns, please contact 833-799-3978 with any questions. Protecting personal information is important to Somnia, and we sincerely apologize for any concern this incident may cause.
